

Bob's "Safe" List

Safety is determined by the molecular weight of the pure compound

Urea 46%N

Zinc Sulfate 36% Zn

Bob's "Safe" List

Nitrogen: Urea 46-0-0
Ammonium Nitrate 34-0-0
Calcium Nitrate 15.5-0-0

Phosphate: Monoammonium Phosphate 11-52-0
Triple Superphosphate 0-46-0

Potash: Potassium Sulfate 0-0-52
Potassium Nitrate 13-0-44

Sulfur: Elemental Sulfur 99% S

Magnesium: Magnesium Sulfate (Epsom Salt) 9% or 20% Mg

Calcium: Gypsum 23% Ca

Zinc: Zinc Sulfate 36% Zn

Bob's "Safe" List

Iron: Iron Sulfate 36% Fe

Copper: Copper Sulfate 25% Cu

Manganese: Manganese Sulfate 24% Mn

Molybdenum: Sodium Molybdate 39% Mo

Boron: Borax 11% B
Sodium Tetraborate (Solubor) 20% B

Description

Ideal for Returning Life to the Soil! Providing a balance of biological life for all vegetables, indoor gardens, flowers, bedding plants, potted plants, legumes, all trees, shrubs, annuals, perennials, and as a treatment for lawns to break down and digest thatch.

SuperActive™ Soil & Seed Inoculant is formulated to activate life into the soil, while also inoculating legume seeds for maximum germination and transplant success. Formulated and cultured to work fast for maximum viability for nutrient release. Micronization ensures that the inoculant tea can travel deep into the soil structure for maximum root coverage and soil penetration. Very easy to use; just mix with non-chlorinated water for soil application, or with whole milk to inoculate legume seeds.

- Micronized, Concentrated Seaweed Extract, Whey Protein, High Fructose Corn Sugar and beneficial soil microbes; Essential Nutrients loaded with bioavailable multi-minerals.
- Seven select "Champion strains" of beneficial soil microbes.
- Apply a generous helping, as directed, at time of planting or transplanting for a bioactive supply of nutrients to maximize your plants' health potential. Return beds to health and boost containers.
- Use as soil drench or foliar spray.
- Add SuperActive™ to tea to maximize biological activity.
